

FIRST CHOICE PROJECTS

We are committed to sustainable construction practices and giving back to society. We partner with local communities to provide skills training and job opportunities. Our vision is to set new benchmarks in engineering excellence while promoting positive social change.

About Us

First Choice Projects was founded in 2023 by a group of passionate engineers with over 24 years of experience in engineering, construction, commissioning, and maintenance in the power, oil and gas sectors. Our goal is to be the premier in power plant construction, operation, and maintenance by delivering excellence and reliability to every project.

First Choice is a combination of supplying professional talents of all disciplines and providing services of erection, commissioning, overhauling, operation, and maintenance to thermal, combined cycle, Hydel, solar power plants, oil, and gas sectors.

At First Choice Projects, we believe in building strong relationships with our clients based on trust, transparency, and collaboration. Our core values revolve around integrity, accountability, safety, and community upliftment. We aim to foster an inclusive work culture where every team member feels empowered to innovate and make a difference.

Our Mission

To deliver outstanding commercial and industrial construction projects through a client-focused approach, quality workmanship, and budget responsibility. We harness the talent of our dedicated team members to complete projects on schedule, building long-term partnerships through integrity, collaboration, and ensuring client satisfaction at every stage.

Our Vision

To be the preferred construction partner through a commitment to sustainable practices, community engagement, and innovative solutions that create value for clients. We envision constant improvement of our processes and skills to deliver projects that have a positive economic and social impact, while preserving natural resources for future generations.

Our Services

01

Civil Engineering Services

Structural design, Quantity Surveying, Planning and Supervision

02

Construction and Commissioning

End-to-End execution of projects across domains

03

Mechanical Engineering Services

Design of balance of plant, Piping system, HVAC, plumbing, fire protection

04

Operation and Maintenance

Plant control room operations, predictive maintenance, minor/major overhauls, energy optimization

05

Electrical Engineering Services

Power distribution and lighting design, Electrical testing, Transformers, and OHL maintenance

06

Manpower Supply

Skilled technicians and Supervisors across Disciplines

07

Instrumentation Services

Automation control systems, Instrument loop checks and calibration
